Reference your recent request for responses to Dublin Port Post Dialogue I believe that my response of May 18th 2018 attached still holds firm to day and all steps must be taken at all times 365 days a year to protect these waters for everyday swimmers

Regards
Paddy Markham

I would like to make the following submission re above report It is regards the Swimming areas off the North Bull Wall and the preservation of same The North Bull wall swimming areas comprising of three structures are by far the most popular swimming area in the DCC areas and are widely used all year around and especially in Summer As I read your reports there is plenty of mention of walks, cycle paths protection of Fauna, sea birds, seals, a city farm etc but no mention of the the many human beings who daily swim off the North Bull Wall Thus area has been used I believe as a swimming area since the wall was built and this should be recognized in any Masterplan I note quote <This Masterplan 2040 sets out how Dublin Port Company will maximise the value of Dublin Port to the life of the city and its citizens > Unquote Quote <The Port will continue to develop initiatives to promote leisure activities such as sailing, *swimming* and fishing, working with the established clubs on ways to involve more people in marine based activity > Unquote This is the only mention I believe of swimming in the plan and is insufficient and to my knowledge very little interaction has taken place with the swimmers I believe that the preservation of the swimming area needs to be included in any plan for this area I would be obliged if above would be taken into consideration before the finalization of the Dublin Port Masterplan 2040
